

Accounting and Billing Management

Ultimate & Digital Invoice Management System

Invoice Management System where users can manage all the invoices in one place and digitally.

The client will get its separate login panel from where he can see the lists of his invoices and do payments.

Here are some Key Features and Concepts that E-Invoices can provides

Key Features

Admin Panel

- Dashboard
- Clients
- Products
- Taxes
- Transactions
- Settings
- Invoice Template
- Multi Lingual
- Multi-Currency

Client Panel

- Dashboard
- Invoices
- Pay Invoice
- Transactions

Dashboard

Powerful admin dashboard where admin can see the overview of the application, what's going on, what is the revenue, etc.

Clients

You can create a client from the admin panel, and yes of course clients will get their separate panel, where they can see his assigned/sent invoices and perform related actions.

Products

You can create your products from where, which will be later used in invoice creation. You can define the price, set image, and related information.

Product Categories

You can create different kinds of product categories which will be used in product creation, you can choose categories while creating products.

Taxes

You can create different kinds of taxes from here, e.g GST / IGST / etc with related percentages. Taxes will be used while creating the invoice.

Transactions

All the invoices transactions will be listed here, either it will be manually or via stripe. you can see the detailed information here.

Settings

You can manage to generate settings from here, like the app logo, favicon currency, and company address. Also, you can manage the number format and decimal separator settings from here.

Invoice Template

We are supporting the beautiful invoice template, which is used when you print the invoice template. You can manage the downloaded invoice format by using this interface.

Multi Currency

You can add your currency here, whatever you want to show before the price everywhere. The selected currency will be reflected everywhere in the project.
